

BIS MITRA Domain 4 - Hallmarking / HUID / Jewellers / AHC

Synthetic demonstration dataset for BIS MITRA. These records are fictional and must not be interpreted as official BIS data.

Dataset overview

Record count: 12. Gold and silver articles, multiple synthetic jewellers and synthetic Assaying & Hallmarking Centres are represented.

HUIDs, registrations, weights, purity/fineness values and AHC references are fictional demonstration data only.

The dataset includes valid synthetic HUIDs plus one deliberately flagged HUID mismatch for consumer-verification exception handling.
